

FIPA
challenge accepted

FIPALIFTpro
powerful,
intuitive lifting

Handle heavy objects without effort. Work with efficiency and ease – **FIPALIFTpro.**

75kg load capacity

Work with ease

Simple one-hand control

Robust and durable

Ergonomic and efficient

For use in every
industrial environment

FIPALIFTpro with its unique control handle design, allows for powerful lifting of loads up to 75kg. The intuitive, ergonomic, easy to use single handed controls create a versatile, user friendly and powerful solution. Lift, lower and balance the load all with one hand.

Our aim at FIPA is to provide equipment and solutions that create user happiness and thus promote workplace well-being. Effective ergonomic handling equipment requires operators being willing and able to use the equipment, so intuitive easy to use controls are essential.

Good Ergonomics bring good Economics. The FIPALIFTpro, with its premium construction ensures a robust hard wearing product, that is able to meet the demands of all industrial environments, delivering an increase in both productivity and wellbeing.

1

Ergonomic control handle allows for easy, smooth and quick lifting. The controls are easy to use for both left and right handed operators

2

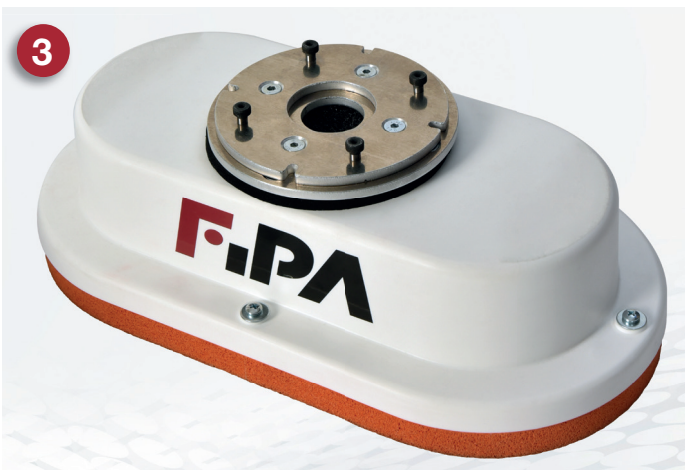

Integrated 90 degree angle joint and 360 degree swivel allow for flexible lifting. The quick disconnection system ensures the quick and smooth change between suction feet.

3/4

A wide range of suction feet are available to handle a wide variety of objects and applications. Pictured below are ...

Image 3: Sack foot for bag/sack handling

Image 4: Adjustable double rectangular suction foot.

FIPA, challenge accepted.

Vacuum, gripping and lifting technology
for reliable and efficient handling
of your workpieces.
